Accessing Your fedorapeople.org Space

1. You need an active Fedora account (<https://admin.fedoraproject.org/accounts/>)
2. You must be sponsored in a group (other than the CLA groups)
3. To connect, use the ssh key you uploaded into your Fedora account:

```
ssh your_fedora_username@fedorapeople.org
```

Common Answers

1. Each Fedora contributor has 150 MiB of quota-controlled space.
2. To make a publicly viewable space, create a `public_html` directory.
3. Upload files using `scp`, `sftp`, or `rsync`.
4. Once uploaded into the users `public_html` directory the files are available via `http` at: `http://your_username.fedorapeople.org/`.
5. Give other users access to read/write/etc files by using extended acls:
 - we support extended acls. Read man pages for `setfacl` and `getfacl` for adding them to your dirs/files. This gives the user `jkeating` read and write access to the file, filename:

```
setfacl -m u:jkeating:rw filename
```
