

## SOUTHWEST INCIDENT MANAGEMENT TEAM #3

## Alan Sinclair-Incident Commander

## Rapid fire spread due to red flag conditions

**Friday July 16, 2016** 

**Fire:** Fuller Fire Containment: 0%

**Acres:** 5,940 **Start Date:** June 29, 2016

Cause: Lightning Location: Point Imperial, N. Rim Grand Canyon NP

**Total Personnel:** 511 **Fuels/Topography:** timber, rugged terrain

**Today**: Firefighters reported extreme fire behavior today including short crown runs and group tree torching as the fire rapidly moved to the northeast in the Saddle Mountain Wilderness. However, nighttime burnout operations along Cape Royal Road successfully held the fire to the north and east of the Road. Fire managers are continuing to assess containment options on the west side of the fire as well as preparing FSR 219 to the north of the main fire.

"Today we strategically engaged the fire where it was safe to do so and pulled back in others," said Jay Lusher, Grand Canyon National Park Fire Management Officer. "Our crews did exactly what they were trained to do in the face of very aggressive fire activity and growth."

Tonight crews will continue to hold existing containment lines and may conduct additional burnout operations where necessary.

**Tomorrow:** Higher humidities may slow additional fire growth. Fire managers will continue to focus on safely keeping the fire east of Highway 67 and north of Cape Royal Road. Crews will also work to the northeast of the Saddle Mountain Wilderness to hold the fire along FSR 8910. Helicopters will continue to drop water as needed to help support firefighters on the ground.

**Smoke:** Smoke from today's fire activity spread to the northeast reaching into central Colorado. Tomorrow smoke will continue to disperse to the east and northeast with little to no impacts over the canyon.
