### **No New Growth on Sitgreaves Complex**

WILLIAMS, Ariz. – With on-going significant rains, there has been no new growth on the Sitgreaves Complex. However, the Bald Mountain area to the southwest of Sitgreaves Mountain continues to hold interior heat. Crews continue to monitor the fire perimeter each day and prepare for increased fire activity once drier conditions return. Smoke impacts are expected to be minimal. For more information on smoke and air quality please visit [www.azdeq.gov](http://www.azdeq.gov) or [wildlandfire.az.gov](http://wildlandfire.az.gov).

**New:** Due to limited fire activity, fire information updates will no longer be sent daily. New fire information will be released as activity increases on an as needed basis.

**Date/Time Reported:** Sunday July 13<sup>th</sup>, 2014

**Location:** 5 miles north, northwest of Parks, Ariz.

**Cause:** Lightning

**Size:** 10,876 acres

**Landscape/Fuels:** Ponderosa Pine

**Fire Behavior:** Majority Low to Moderate Intensity

**Get fire activity updates and maps 24 hours-a-day:**
