

Smoke Outlook for 6/24 - 6/25

North Central Arizona Manguam Fire

Issued at: 2020-06-24 10:13 MDT

Special Statement

This will be the last Manguam Fire specific Smoke Outlook. Thanks for tuning in! Starting tomorrow morning, for air quality information for the Manguam Fire and other fires in Arizona, please reference the Arizona Smoke Outlook.
<https://wildlandfiresmoke.net/outlooks/Arizona>

Fire

The Manguam Fire is 71,108 acres and 68% contained.

Smoke

Smoke from Manguam Fire has notably decreased. Smoke impacts beyond some hazy skies are not expected for the region today. The exception to this is a chance of seeing light smoke impacts later in the day in the Lee's Ferry/Marble Canyon area. If this occurs then looking for smoke possibly pushing northeast up towards Page/Lechee and then the localized smoke settling into the nearby Colorado River drainage overnight. However, the overall regional air quality is expected to remain Good into Thursday. As always, pay attention to any changing conditions.

Health

If you begin to notice health effects from smoke, you are encouraged to follow the "actions to protect yourself" listed below. Always remember if you smell smoke, you are breathing smoke.
