

Smoke Outlook for 6/14 - 6/15
North Central Arizona Mangum Fire
 Issued at: 2020-06-14 10:12 MDT

Special Statement

Additional fires are occurring and may impact air quality. Smoke Outlooks for the Southwest Region, the Bighorn & Gila NF Fires can be found here:
<https://wildlandfiresmoke.net/outlooks/>

Fire

The Mangum Fire is 19,813 acres and 2% contained.

Smoke

Southwest winds will continue to push Mangum smoke to the northeast. However, the smoke should mostly stay aloft with minimal overall impacts to air quality in the surrounding communities. The exception being that the Page/LeChee area may see some smoke settle in at night. Mangum smoke will continue to be visible from both the north and south rims of Grand Canyon National Park, Highway 67, Highway 89A, Fredonia, Kanab and Page. In addition, there are multiple fires burning in the Southwest that are producing smoke and contributing to overall haze across the state and up into southern Utah and Colorado.

Health

If you begin to notice health effects from smoke, you are encouraged to follow the "actions to protect yourself" listed below.

Daily AQI Forecast* for Jun 14, 2020

Station	Yesterday	Sat	Forecast*	Sun	Mon
	hourly	6/13		Comment for Today -- Sun, Jun 14	6/14
Grand Canyon S. Rim			Good Air Quality expected
